

I know that a lot of Members that voted for the line item veto in Congress now wonder whether they did the right thing, now that I'm exercising it. But I'd like to remind you that again I have deferred, in great measure, to Congress. Congress put in 750 projects not requested in our budget or in the Defense Department plan and reduced overall weapons procurement, reduced overall research and development to pay for virtually all of them.

And I'm hoping that in the years ahead I won't be using it as much and future Presidents won't use it as much because it will lead to a different kind of negotiation in the budgeting process. But I think what I did today was responsible and quite restrained. And I believe that it's important to send a signal to the American people that we're going to stay on the budget track we started on and we're going to stay within these numbers and balance the budget. That's one of the things that's given us the big economy we've got.

Alternative Energy Sources

President Cardoso. I'd like to thank all the Brazilian and American journalists for having joined us and for being so good about answering all our questions.

And may I say that the emphasis that President Clinton has put on the environmental issue is one that I would like to bring up for Brazil as well. We have an energy matrix that is very, very clean. We use hydro power and now gas, natural gas. And we are strengthening our links with regard to the energy matrix throughout the rest of Latin America. So I think that our dialog in terms of climate has been extremely positive.

Thank you to everyone.

NOTE: The President's 151st news conference began at 1:40 p.m. in the Garden of Alvorada Palace. President Cardoso spoke in Portuguese, and his remarks were translated by an interpreter. During the news conference, a reporter referred to former Secretary of State Henry Kissinger.

Declaration of the United States-Brazil Partnership for Education

October 14, 1997

We the Presidents of the United States and Brazil recognize that a new reality is reshaping the world and that our citizens must be prepared to meet the challenges of a globalized world in the 21st century. Education is the key to the future. We recognize that working together we will harness inevitable change to the benefit of families in our countries.

Literacy and a first-class educational foundation are critical determinants to the well-being of our citizens, the strength of our economies, and preserving the values we as democratically-elected leaders hold dear.

Skilled and educated people are the foundations of strong democracies and market economies. We must, therefore, ask more of our educational systems than ever before. Our governments have similar initiatives promoting the development of modern information infrastructures that will facilitate economic growth and will be the foundation of new ways to teach and learn. Our students must be able to compete in a new and constantly-changing job market. This requires access to life-long learning programs and the ability to participate in and benefit from varied cultures outside our borders as well as to process and organize more disparate information than ever before. Education is needed to participate actively and knowledgeably in democratic, plural and diverse societies.

The democracies of our hemisphere, which will take part in the next Summit of the Americas to be held next April in Santiago, agree that education must be a central element in our shared agenda. Bearing in mind the urgency of prompt, effective action, as a top priority we have separately launched, within our respective countries, new initiatives to raise the quality of education, particularly in the primary and secondary levels.

And together, today, we hereby establish the United States-Brazil Partnership for Education. Expanding exchanges, upgrading

standards, enhancing teacher training, increasing participation by the family, community and business as well as incorporating new technology underpin our partnership.

Cooperation in the Development and Use of Technologies in Education

New technologies make possible the broad dissemination of information and permit new teaching methods and practices such as distance learning and the use of computers. In addition, students must also master new technologies in preparation for a changing workplace and take part in economic development. We will take advantage of technologies such as the Internet to broaden cultural and language contacts for our students and teachers. We will jointly test and evaluate existing technologies, and facilitate development of appropriate new technologies, while engaging the private sector to assist with their introduction into the classroom.

Ensuring that Every Child Learns Through Educational Standards, Assessments, and Indicators

Evaluating the performance of educational systems requires a clear definition of what schools should teach and what students are expected to know, as well as effective tools for measuring progress. Our governments will each establish standards for student performance in key subjects at appropriate levels, as well as the means to measure them. We will share experiences and information regarding progress on a continuous basis.

Strengthening Preparation and Professional Development of Teachers and School Managers

Excellent schools require excellent teachers and managers. We will seek to have qualified, dedicated teachers in all classrooms, at all grades. To support this goal, we will exchange experiences and evaluate alternative models for teacher preparation and training for school management officials. We will especially consider ways to improve training for science teachers of scientific disciplines at the primary and secondary levels.

Increasing Educational Exchanges Between the United States and Brazil

Already sharing a wide array of public and private educational exchange programs, the United States and Brazil will seek to expand exchanges at all levels, focusing on the priorities in this declaration. We will utilize existing and new mechanisms to establish a student exchange program for university students in mutually agreed areas such as engineering and technology. We will also consider a program of exchanges for language teachers to strengthen language skills and cultural ties between our countries. To assist private programs, we will explore methods for linking institutions to promote mutual recognition of educational credits.

Enhancing Family, Community, and Business Involvement in Education

Opportunities for learning extend beyond the formal classroom. Parents, family members, employers, employees, older students, and volunteers can effectively participate in the education of children, especially in literacy enhancement. We re-affirm that the private sector is partner in education and will promote its involvement in such areas as combatting illiteracy and student dropout rates and enhancing school administration and overall school development.

Implementing the Partnership

Finally, to ensure our partnership is vigorously implemented, we hereby establish the Education Partnership Implementation Commission (EPIC). Through regular meetings, EPIC will monitor implementation of actions outlined in the annex to the Memorandum of Understanding to which our governments subscribe today, as well as periodically formulate new actions. In furtherance of the precepts set forth in this Declaration, EPIC will also seek participation of the private sector and members of the public in implementation of this agreement. Working together, we will reinforce our common resolve, deepen our bonds of friendships, and prepare our children for the coming century.

William Jefferson Clinton
Fernando Henrique Cardoso

**Statement on Line Item Vetoes
of the Department of Defense
Appropriations Act, 1998**

October 14, 1997

Over the past 4½ years, my administration has worked hard to cut the deficit and to ensure that our tax dollars are used wisely, carefully, and effectively. We have reduced the deficit by 85 percent even before enacting the historic balanced budget legislation this past summer.

The line item veto gives the President an important tool to save taxpayers money, avoid unnecessary Government spending, and ensure that the national interest prevails over narrow interests. It will enable America to continue the fiscal discipline that has helped create our strong economic expansion. And by allowing a President to sign important legislation while canceling projects that do not meet important national goals, it will change the way Washington works.

America must—and will—continue to have the world's strongest military. We have an obligation to manage our defense budget with both national security and fiscal responsibility in mind. Every penny of our defense dollars should be used to sustain and strengthen the best trained, the best equipped, and the best prepared Armed Forces in the world.

Today, for the third time, I am using the line item veto to cancel 13 projects inserted by Congress into the Department of Defense's appropriations bill. These cancellations will save the American taxpayer \$144 million. This use of the line item veto will help ensure that we focus on the projects that will best secure our strength in the years to come.

I canceled the projects because they were not requested in my fiscal year 1998 budget, and because either they were not contained in our future years defense program or the Department of Defense determined that they would not make a significant contribution to U.S. military capability. In two cases, I canceled items that had broader policy im-

plications for longstanding U.S. national security policy. I have been assured by the Secretary of Defense that none of the cancellations would undercut our national security or adversely affect the readiness of our forces or their operations in defense of our Nation.

As I said last week, I will continue to scrutinize other appropriation bills, using appropriate criteria in each instance, and I will exercise the line item veto when warranted.

NOTE: The reports detailing the cancellations were published in the *Federal Register* on October 15. H.R. 2266, approved October 8, was assigned Public Law Number 105–56.

**Letter to Congressional Leaders on
Line Item Vetoes of the Department
of Defense Appropriations Act, 1998**

October 14, 1997

Dear Mr. Speaker: (Dear Mr. President:)

In accordance with the Line Item Veto Act, I hereby cancel the dollar amounts of discretionary budget authority, as specified in the attached reports, contained in the "Department of Defense Appropriations Act, 1998" (Public Law 105–56; H.R. 2266). I have determined that the cancellation of these amounts will reduce the Federal budget deficit, will not impair any essential Government functions, and will not harm the national interest. This letter, together with its attachments, constitute a special message under section 1022 of the Congressional Budget and Compoundment Act of 1974, as amended.

Sincerely,

William J. Clinton

NOTE: Identical letters were sent to Newt Gingrich, Speaker of the House of Representatives, and Albert Gore, Jr., President of the Senate. The reports detailing the cancellations were published in the *Federal Register* on October 15.

**Remarks to Business Leaders in
Sao Paulo, Brazil**

October 15, 1997

Thank you very much, Mr. Miller, for your introduction and your statement. Thank you, Governor, for your moving words. And thank you all for coming out this morning. I am
